

## What is new in PolyWorks?

### New Comparison-to-CAD Technique

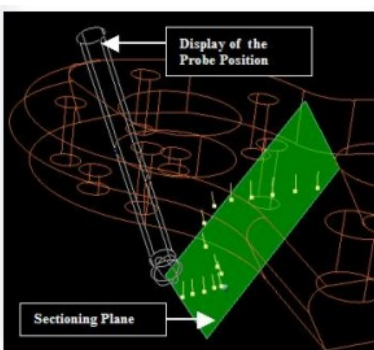

PolyWorks 9.1 now offers a complete toolset for simultaneously comparing multiple instances of a part to a CAD model. Several polygonal models can be compared in order to obtain the "multiple parts variability" (mean, standard deviation, etc). This tool can be used to analyse the fabrication process.

### New Probing Techniques

PolyWorks 9.1 now offers assisted cross-section probing, assisted comparison point probing, and robust methods for probing sheet metal features.

## New PolyWorks Distributors

InnovMetric Software is constantly increasing its distribution network. We are proud to welcome the following new distributors to our team:

- **Carl Zeiss Industrielle Messtechnik** Europe, Bundled reseller on Zeiss Eagle Eye 3D digitizer systems, Zeiss CT-scanning systems, and Wolf&Beck 3D digitizer systems  
[www.zeiss.de/imt](http://www.zeiss.de/imt)
- **NMS s.r.o.**, Czech Republic, Slovak Republic, Slovenia et Hungary  
 Master Distributor  
 Main scanners: Steinbichler and Leica Geosystems T-Scan 3D digitizers [igor.lengyel@nms.sk](mailto:igor.lengyel@nms.sk)
- **Leica Geosystems AG (Metrology Division)**  
 Worldwide  
 Bundled reseller on Leica scanners  
[www.leica-geosystems.com/metrology](http://www.leica-geosystems.com/metrology)
- **QFP s.r.l.**, Italy  
 Master Distributor (on all scanners)  
[www.qfp-service.it](http://www.qfp-service.it)
- **ShapeQuest**, North-America  
 Bundled reseller on StarCam, ShapeCapture, and ShapeMonitor  
[www.shapecapture.com](http://www.shapecapture.com)
- **HS&S**, Northern California and Nevada  
 Bundled reseller on Leica T-Scan, Perceptron, and VX Technology  
[www.hsands.com](http://www.hsands.com)
- **Fadak Sanat Gostar Co.**, Iran  
 Master Distributor (on all scanners)  
[www.fadaksanat.com](http://www.fadaksanat.com)

## InnovMetric Software releases PolyWorks 9.1

InnovMetric Software is pleased to announce the release of PolyWorks 9.1. Release 9.1 has been developed in close collaboration with four major automotive companies in Germany, Japan, and the USA, and two major aerospace accounts in North America. The new release offers significant new tools for reverse-engineering, virtual-assembly, pilot-assembly, and first-article inspection applications.

InnovMetric has also worked in close collaboration with hardware manufacturers, to continue the **smooth integration of laser scanner, laser tracker, and hard probing capabilities within the PolyWorks interface**. With these new functionalities, PolyWorks strengthens its position as the leading solution for seamlessly interacting with all non-contact and contact-based digitizing technologies.

"Our main objective with this release is to further increase our presence in our corporate accounts by expanding the use of PolyWorks within each department", says Marc Soucy, President of InnovMetric Software. "We are confident that PolyWorks 9.1 will pave the way to exciting new applications", he continued.

PolyWorks 9.1 is available for download on InnovMetric's on-line Technical Support Zone.

## International PolyWorks User Meeting 2006 Québec, Canada

### Free PolyWorks V10 training at IPUM2006

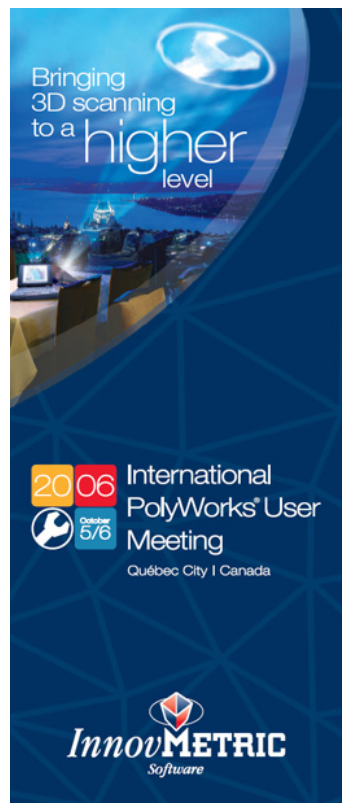

Want to learn to use the new features of the upcoming PolyWorks V10?

InnovMetric announces that free PolyWorks V10 mini training sessions will be offered at the next PolyWorks User Meeting.

The IPUM2006 is also a unique chance to meet most major 3D scanner manufacturers, all gathered in the 3D Scanning Exposition Pavilion.

Do not miss this opportunity to increase your productivity with the PolyWorks software suite!

## Leica Geosystems Chooses the PolyWorks Reverse-Engineering Software for the Leica T-Scan Hand Scanner

Leica Geosystems (Metrology Division) has signed an agreement with InnovMetric Software Inc for the integration and distribution of the PolyWorks software suite with the Leica T-Scan hand scanner. The Leica T-Scan/PolyWorks combination provides users with a very flexible and accurate reverse-engineering solution for quickly digitizing large objects into STL and CAD models. Sales of the T-Scan/PolyWorks bundled package will be ensured by Leica's worldwide sales network, while Japan and South-East Asia will be covered by Tokyo Boeki Techno Systems and Cairnhill Metrology (who already distribute both Leica Geosystems' and InnovMetric Software's products in those markets).

"The Leica T-Scan/PolyWorks combination is a perfect fit for us," continues Pirmin Bitzi, Product Manager at Leica Geosystems. "Our Leica Laser Trackers and PolyWorks both have a strong presence in the automotive and aeronautic marketplace, and we feel that the Leica Geosystems/PolyWorks combined solution will let us further expand in these crucial markets," concludes Bitzi.

## InnovMetric Wins the Fidéides Award for Exportation and is Finalist for a Distinction Award.

- **Exportation - Fidéides Gala** (Quebec Regional Chamber of Commerce)

On March 16 2006, InnovMetric Software won the "Exportation" Award at the **Fidéides Gala** in Québec City, Canada. This annual event is organized by the Quebec Regional Chamber of Commerce and gathers the most successful businesses of the Quebec Metropolitan Area. This is the third Fidéides Award for InnovMetric, who won the Fidéides "High Technology" in 2001 and "Exportation" in 2002.

**Marc Boulanger**, Director Worldwide Sales InnovMetric, and **Marc Soucy**, President InnovMetric.

- **Distinction Outside of the Province of Québec - Gala des Grands Québécois** (Quebec Chamber of Commerce)

InnovMetric Software is also nominated for the Distinction Award of the **Gala des Grands Québécois** organized by the Quebec Chamber of Commerce. This event will be held on April 7, 2006 at the beautiful *Château Frontenac* in Québec City, Canada.

Mr. **Richard Legendre**, President of the organizing committee and Mr. **Marc Soucy**, President of InnovMetric Software Inc. on the day of the nomination.
